AX240

Axesstel Home Alert System with Fixed Cellular Terminal

Wireless Alert Notification

The AX240 Alert System has a built in 1x-advanced cellular wireless modem that can send an SMS message or place a phone call to pre-assigned numbers when the sensor detects motion.

Landline Phone Replacement

The AX240 has an RJ-11 interface for POTS phones to make and receive phone calls as done through a landline.

Emergency Backup Battery

An AC adaptor with a 1600mAh backup battery provides continued functionality in the event of a power outage.

Remote Control Convenience

The arming and disarming of the AX240 Alert System can be triggered by keypad input and also by sending a remote SMS.

Affordable, Easy to Setup, Configure, and Use

Setup and configuration of the AX240 Alert System is accomplished simply. 10 LED indicators represent the product status. This reasonably priced system can be configured for use with up to 200 sensors or motion detectors.

Reliability

Experience the enhanced performance and superior quality that Axesstel has become known for.
