TX241G

CDMA Fixed Wireless Voice Terminal

Landline Phone Replacement

The TX241G is perfect for consumers searching for a seamless POTS (Plain Old Telephone Service) line replacement service for the home or office.

Maintain Landline Functionality

Migrate from landline to cellular without losing any functionality from regular home phone service.

Emergency Backup Battery

An AC adaptor with a 1600mAh backup battery provides continued functionality in the event of a power outage.

AGPS Support

The TX241G's advanced Assisted GPS feature provides E911 service to accurately determine the location of the caller in case of emergency.

Affordable, Easy to Setup, Configure, and Use

Setup and configuration of this cost effective cellular terminal is accomplished simply. 5 LED indicators represent the product status.

Reliability

Experience the enhanced performance and superior quality that Axesstel has become known for.
